

Sub 12-29 Apparatus according to Claim 19 wherein the parallel material webs are suspended in the frame so that spaces between the parallel material ^{are} accessible from above.

12
30. Apparatus according to Claim 19 wherein the parallel material webs are suspended on transverse bars through eyes in the material web.

13
31. Apparatus according to Claim 30 wherein the bars are hung in the frame and the frame is a collapsible frame.

14
32. Apparatus according to Claim 19 wherein spacers are provided between adjacent parallel material webs.

15
33. Apparatus according to Claim 30 wherein spacers are provided between adjacent parallel material webs.

16
34. Apparatus according to Claim 19 wherein the frame is collapsible.

17
35. Apparatus according to Claim 19 wherein the parallel material webs are provided in mutually interconnected relationship only in respective pairs by connecting webs.

18
36. Apparatus according to Claim 19 wherein more than two parallel material webs are interconnected by connecting webs between adjacent parallel material webs.

19
37. Apparatus according to Claim 19 wherein the connecting web has a substantially flat insert comprising a material which is less flexible than the material of the connecting web and the parallel material webs.

²⁰
~~38.~~ Apparatus according to Claim ~~19~~¹ wherein open sides of the substantially U-shaped pockets are closable by a curtain.

A1 ²¹
~~39.~~ Apparatus according to Claim ~~19~~¹ wherein open sides of the substantially U-shaped pockets are closable by further material webs extending perpendicularly to the separate material webs.

²²
~~40.~~ Apparatus according to Claim ~~19~~¹ wherein a cushion material is arranged between adjacent parallel material webs which are not connected by a connecting web.
